**T**uscany:  
the context  
and  
significant data

# CURRENT DATA FOR THE TUSCANY HEALTHCARE SYSTEM

|                                  |   |
|----------------------------------|---|
| <b>Population</b>                | 3,5 million<br>6.5% of Italian population |
| <b>G.D.P.</b>                    | € 105 billion                             |
| <b>Public health expenditure</b> | € 7.1 billion                             |
| <b>Expenditure per head</b>      | € 1.700                                   |

# HEALTHCARE IS THE LARGEST ECONOMIC ACTOR IN THE REGION

50.000 employees

50.000 allied employees

6% of the regional G.D.P.

1/3 of the total public expenditure

# THE TUSCANY MODEL

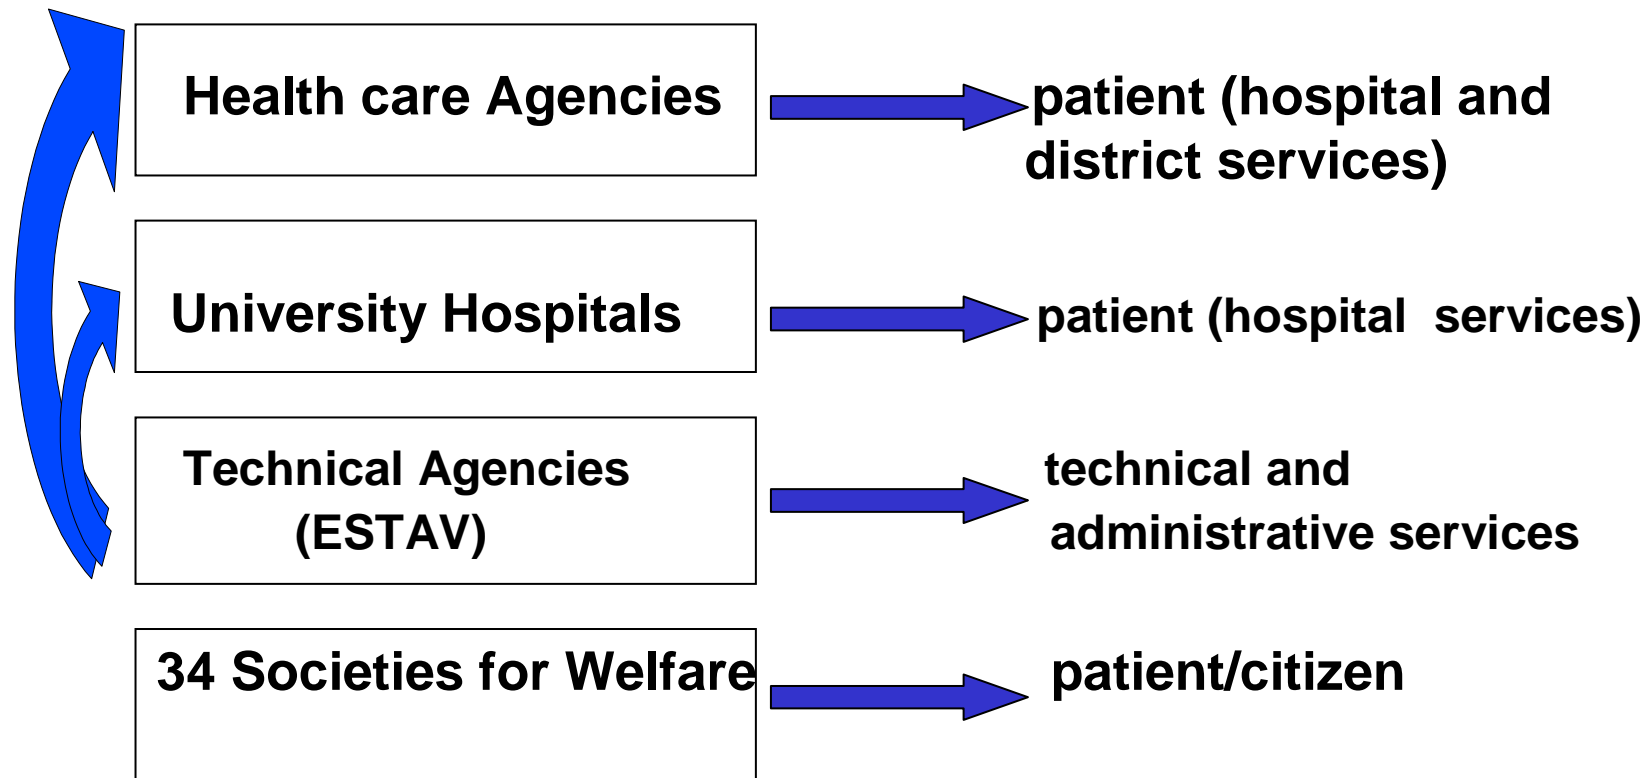

- Equilibrio del bilancio sanitario
- Ottime performance negli indicatori di qualità delle prestazioni erogate

Sono il frutto di un sistema che ha saputo innovare i processi e le metodologie

# Innovazioni di processo

- AREE VASTE
- ESTAV
- SOCIETA' DELLA SALUTE

# THE HEALTHCARE SERVICES FRAMEWORK

# **THE TUSCANY SYSTEM: the importance of data**

Since we are “a system” we have access to a full data set

- monitor performance at all levels

- use data to track and improve quality

- identify opportunities to improve effectiveness
